

BULK HANDLING NEWS: A GOOD READ

We publish our customer magazine Bulk Handling News twice a year. It contains our news stories along with industry-related articles ranging from detailed analysis of market sectors to operational case studies.

These studies cover new stand-alone deliveries to complex terminal projects. You might learn why a road-mobile unloader could be the perfect solution for you or how to stay safe when handling hazardous bulk materials. We tell you about our service and maintenance activities, illustrating the commitment we bring to our customers throughout the working lives of their Bruks Siwertell bulk material handling systems.

Below you will find the three latest issues. For older issues, please visit our digital magazine page on issuu.com
